TABLE OF CONTENTS

Introduction and Definitions

- Table 1.** Ohio Population by Race, 1980-1990
- Table 2.** Population by Race by County, 1990
- Table 3.** Population by Racial Percentage by County, 1990
- Table 4.** Ohio Counties Ranked by Nonwhite Population, 1990
- Table 5.** Ohio Counties Ranked by Black Population, 1990
- Table 6.** Ohio Counties Ranked by American Indian Population, 1990
- Table 7.** Ohio Counties Ranked by Asian Population, 1990
- Map 1.** Percent Nonwhite, 1990

INTRODUCTION

The racial composition of Ohio's population is about seven-eighths white and one-eighth nonwhite. Ninety percent of the nonwhites are Black, making-up 10.6 percent of the total population of Ohio. No other racial group accounts for more than one percent of the state's population. Asian and Pacific Islanders are the largest "other" group with slightly more than 91,000 residents. The nonwhite population of Ohio increased by more ten percent over the decade while the white population was declining by slightly less than one percent. The Asian population nearly doubled between 1980 and 1990. The large percentage increase in American Indian population (66.3%) may be more the result of changes in self-identification of these individuals than actual changes in population.

The largest numbers and percentages of nonwhites are located in Ohio's metropolitan counties. The populations of Cuyahoga and Hamilton counties are made-up of more than 20 percent nonwhites, with seven other metropolitan counties having between 10 and 20 percent nonwhite residents.

DEFINITIONS

The Census Bureau provides the following explanation of race. "The concept of race as used by the Census Bureau reflects self-identification; it does not denote any clear-cut scientific definition of biological stock. The data for race represents self-classification by people according to the race with which they most closely identify. Furthermore, it is recognized that the categories of the race item include both racial and national origin or socio-cultural groups." Following are the standard classifications of race as used by the Census Bureau:

1. **White** - Includes persons who indicated their race as "White" or reported entries such as Canadian, German, Italian, Lebanese, Near Easterner, Arab, or Polish.
2. **Black** - Includes persons who indicated their race as "Black or Negro" or reported entries such as African American, Afro-American, Black Puerto Rican, Jamaican, Nigerian, West Indian, or Haitian.
3. **American Indian** - Includes persons who classified themselves as American Indian, Eskimo, or Aleut, or specified the name of an Indian Tribe.
4. **Asian** - Includes Chinese, Filipino, Japanese, Asian Indian, Korean, Vietnamese, Cambodian, Laotian, Thai and Pacific Islander. Pacific Islander includes Hawaiian, Samoan, Guamanian, and other Polynesian, Micronesian and Melanesian groups.
5. **Hispanic Origin** - This category is entirely separate from race, but is commonly included in analysis of race and origin. Origin can be viewed as the ancestry, nationality group, lineage, or country of birth of the person or their ancestors before their arrival in the United States. Hispanic origin includes those who classified themselves as Mexican, Puerto Rican, Cuban or other Spanish speaking countries of Central or South America.
